## About This Game

### Welcome

Adventure Portal is a simple platform that allows players to connect and run their pen and paper role playing campaigns online!

It is currently constructed to support 5th edition play. This is an ongoing project that will see additions and improvements as support grows. I built this to be a simple and easy to use alternative to the more complicated and expensive options out there.

Adventure Portal features player and gm profiles that hold stats and campaign information, an encounter/world map where players and DMs can place custom tokens -- each with their own information sheets, sizes, names, images, and a sound and music board for storytelling enrichment.

really fun good and challenging

Cons: no ragdoll lol. Macabre, diverting fun for a bunch of hours.. Another great trivia game, with a shorter timer and some very difficult questions - this game is for anyone who loves trivia and loves a challenge.

I had difficulty answering most of the questions because I am British and I don't know a lot of American history and I kept getting the same questions over and over again.. i want to sit on der f\u00fchrer's lap. I would recommend this game for some simple reasons if you like puzzle and you are a little geeky and know the basics of programming u should buy it and finish it its not simple or difficult its average

10/10 would buy again. Great game, many♥♥♥♥♥ need more.

Good low replayability interactive e-book-like game where you are the hero.

I like those, they remind me of when I was a teenager and was reading the real deal. To compensate for eye-ruining screens, they have included special effects, especially sound effects.

Buy only if you like books where you are the hero.. Crap!!!!

This game supports no controllers!

unplayable!. The servers are objectively great. 128 tick, low ping and almost no loss and variance.

The community, on the other hand, is the most toxic I've ever seen. Now don't get me wrong, I know I can tilt and be toxic, but I definitely do not do that unless someone's provoked me. I almost always carry, and when I don't, I am a support player that gets traded or sets up his teammates for success. Yet in around 40-50% of games I get people who are toxic or just plain trolling, and when I get triggered I block them. Sometimes, like what happened in my last game however, I don't do that early enough and end up saying some stupid and I get banned but they don't. It's just like when you see a kid getting hit and he hits back, yet only the one who hit back gets punished. WTF?

TLDR: Basically MM with fewer cheaters (even though there still are some) and more trolls. Oh and a weirder ranking system (I'm A- yet somehow I get queued with C-B players. TF?. This game feels so broken. The mechanics lack explanation, the graphics are ok, but everything else such as fighting, steering, and shooting feels clunky.. Lazy building; pay \$12,000 and 100 power for a building that just floods research points. Useful for rushing technology, but hardly worth the cost, especially when there are plenty of other buildings that can boost research while providing jobs or other services. The mission is boring.. Used Black Ink to do a sketch the first time and attempted to save the file, and it ate it with no backup or autosave recourse. Heartbreaking, really, because the product itself feels good.. I am seasoned Vet on this game... i give it 8.5/10 stars great but need more camos!
