I love this soundtrack so much.... All in all, I think this is a really fun game, and I've had a lot of fun trying to complete the speedruns (which I'm usually not a fan of). For the price of only 6,99€, I would highly recommend this small indie gem.. The map is so much better, thank goodness.

However, they added some unnecessary complexity. Runes to modify how a level plays out are now farmed and consumed, reaking of something done for F2P games. Items and Item Transmuting was added, and while the items are neat, they are a mess to put something coherent together with. Transmuting is nearly a complete waste as you don't really increase the quality of the item by destroying 3 other items.

I'm not far enough into it to rule on too much else. Level design is more complex and there are a ton more enemies with new abilities. All of that looks good.

I cannot help but think they put too much into developing this for tablets and app stores though. A few changes would make this game as amazing as the first, but seeing as they are intrinsic to the "improvements" upon the first, I don't see any of that happening.

I'd rate this a 3/5 so far. Definitely fun, but if you're looking for something more like the original, you're going to be at least a bit disappointed.. Although I have only made it to Chapter 4 so far, this game reminds me of the old classical games such as the original Kings Quest games. Unlike Heroine's Quest, combat is not its focus rather it is more puzzle based and there are often more than one solution to the puzzle.

Overall it is not a bad game, and I bought it because I liked Heroine's Quest and decided to support the company through this purchase. you run around in a maze like a idiot. A charming time management game with a simple storyline. You play as a westerner who is stuck on a tropical island, and have to guide them through building huts, gathering resources etc.. The game is narrated by a relaxed male voice who guides you through the simple story. As you proceed the challenge becomes higher, starting with simple tasks like 'gather 200 food' but later on introducing obstacles like bandits and ghosts. The story makes it all fit in the world though.

MOAI has a nice art style with vibrant colours that make each level nice to look at, without hiding the various clickable spots from view. The soundtrack is relaxing and never gets in the way.

Alawar has a lot of time management games out and it's obvious they've mastered the genre by now. MOAI is another example, design-wise it is perfectly balanced.

It has Steam achievements, trading cards, and Steam cloud support for saves.

The only real negative remark I have, and it's a tiny one, is that I can't get it to run maximized on a single 1920x1080 window, instead I either have to play it full-screen with other monitors blanked; or windowed at what seems to be 1440x900.

Definitely earns a positive recommendation.. A really fun game with a nice art style!

I really like how it starts up, reminding me of the old days.

The style is really nice too you can set it to look like an old tv or to hd. The overall style is also nice.

The gameplay is pretty good, the only complaints i have are:

1. The character walks a bit too slow for my liking (but maybe that's me).
2. The character jumps a second after i press space (but this can ofcourse be fixed).

You have about ten levels and a bit of a story.

It's just a run and gun, but a really fun one

It's overall just a fun little game that has enough to offer for its price.

If you are thinking about buying it, you should its totally worth the price. Being a huge Avenged Sevenfold fan, I never expected them down the road to make such an amazing video game. I'm not a huge fan of games like these, but this one makes a huge exception. I love the music in the game, I love the gameplay, the graphics aren't like 100% modern day, but I think they go very well with the game. The storyline is very awesome. I also got really excited when I saw the original late drummer Jimmy "The

Rev" Sullivan was implemented into the game, and its just awesome!!! I'm not fully done with the game yet, but I can't wait to see what else is in store. If you're not a fan of A7X, at least give the game a shot. The game itself is definitely worth it!!!!

When it runs, the software gives excellent results but it often won't run. I've been using RealityCapture for a year or so now and enjoy its speed and the quality of the reconstructions. However, I have had issues with the Steam version, it often crashes or loses connection to Steam, causing me to lose my work. It appears the Steam version of RealityCapture has been having this issue for quite a few months now <https://steamcommunity.com/app/489180/discussions/0/1696048426815193753/>.

I still recommend RealityCapture, as I said the final models are my favorite of any similar software. But I recommend you purchase it from their website, not the steam version.. fun game, good updates and awesome theme: space <3. Awesome top-down arcade/combat racer with the visual style of Arcadia and Geometry Wars. Also, just got a HUGE free update which gave it more levels, more music, more awesome, and MULTIPLAYER. One of the best titles for the money :). yes yes very good yes. A pretty neat game. For the price I think it was good. You buy homes and sell them for a higher price. The music is nice. The are is decent. It's a great game for killing some time.. Really cute puzzle game with lots of beautiful backdrops, silly robots and epic music.. I know the guy who made this. This game was all him, and I have to say, he did a bang-up job making it onto Steam!

If you're reading this, "Xivek", Liam says hey.. Good inspiration.I like it.. I liked it. Nicer puzzles than most similar titles and they stick to the themes. It's abotuthe puzzles not the plots.
