I am an air purifier/vacuum and was looking for a new way to control the settings, which would require a screen, a remote and something smart enough to adapt and understand the commands. I installed vArranger and voila, it works very well and it's one of those apps that will change your life. I never thought that I could program such a thing, but this app really does it. I have found the best air purifier for my home, and am very proud to be its owner... I just love this app! The setup is easy, the app is easy to follow. The options are great. I feel like a true genius when I put everything together, but I had help because I am not a programmer. I think it is obvious that the support is excellent. I am using the app on an iPad, and it works well, without glitches. Many apps require you to get rid of old ones, but there are no issues, it is seamless! I am happy with vArranger, I already made a post, so I don't think I need to tell you more about my passion for it. I highly recommend it to everyone. The best app of 2015. For me is the best app of the year. Absolutely amazing! Thanks to the whole team of vArranger. I was a bit afraid to buy such a expensive app, and I had no idea that such a new and useful app was made! The options are amazing. I can program the app, I can choose the mode that I want, I can choose the amount of light, I can choose the cleaning method. I have even found a way to regulate the air flow! And it is so easy to configure the app, I was not afraid to start using it. I have a fan, a clean air purifier, and the options were perfect, and the machine runs so smoothly. For me, it is perfect, everything I need is in this app, and it is free! I am satisfied. This is my first app and I am proud to be an owner. I recommend it to everyone. And now it's off to the new year. If you are interested in purchasing the app, click on the title of this post. This app is amazing! I am blown away by the possibilities. I have a fan, a clean air purifier, and the option are perfect, and I am very happy with the technology, vArranger is excellent, because it is 82157476af
